New GP Discovery Torch Series Brings Light Power for Daily Lives

XXX, Jun XX, 2008 — GP Batteries today launched a new Discovery Torches series with a unique signature design, an ideal package serving different usages for household, at work place and individual use. The unique triangular body shape helps prevent torches from rolling when they are placed on a flat surface, making them the most convenient portable light for daily lives.

The GP Discovery Torch Series comprised the Home Range, Work Range and Compact Range.

The **Home Range** is designed for general household use. All three models in this range are equipped with ultra bright krypton light bulbs. Their designs are unique yet contemporary with the eye-catching green color. The night glow switch maximizes users' convenience by allowing them to locate the torch easily in the dark. The tough material used provides good impact resistance. The flat-designed pocket light comes with a hanging clip which facilitates hands-free usage and easy carrying, while its metal casing makes it extremely durable.

The **Work Range** is specially made with weatherproof impact resistance ABS plastic body and the non-slip rubber grip further enhances the toughness for heavy-duty use. The Work Range is also designed with a night glow switch and an ultra bright krypton bulb. It is contemporary and attractive in dark grey and bright orange colors. All the models have a metal hanging ring which gives great convenience to consumers. The Lantern comes with an adjustable stand for hands-free usage and can be adjusted to different beam angles.

The **Compact Range** is tailored for personal use. The two models, a keychain light and a penlight, are compact, light-weight and handy, making them easy to be kept in pockets, purses or briefcases. They are specially designed with durable ABS and metal construction. The long-lasting and ultra bright LED bulb can run over 100,000 hours, offering consumers a bright and continual light source anytime at anywhere.

“GP Batteries has always been committed to satisfying customer needs. Torches have become a necessity in people’s daily lives. With the new models launched in GP Discovery Torch series, we are able to cater the lighting needs of customers in different situations and environments,” said Josephine Ng, Marketing Director of GP Batteries.

All models in the GP Discovery Torch series are powered by GP batteries: Ultra Alkaline, Greencell or alkaline button cells. GP batteries are reliable power sources which give superior performance to the torches. GP Discovery Torch series will be introduced in XXX markets at a suggested retail price of XXX.

Home Range

Model L071 – Home Torch (2xAA batteries)

Model L072 – Home Torch (2xD batteries)

Model L075 – Metal Pocket Light (3xAA batteries)

Work Range

Model L073 – Work Torch (2xAA batteries)

Model L074 – Work Torch (2xD batteries)
