Press Release

GP Instant Power provides convenient emergency power for mobile phone

XXX, April XX, 2008 — Nowadays, mobile phone is so popular that it becomes a necessity to our daily lives. Thus, there is an increasing need for emergency power among consumers when their mobile phones are running out of power. In view of this, GP launches the GP Instant Power Emergency Charger, which is compatible with most popular mobile phone models, bringing great convenience to mobile phone users.

GP Instant Power is extremely user-friendly and is a must-have accessory for mobile phone users. With the new universal pack, mobile phones can be charged instantly and the talk time can last up to 3 hours (subject to condition of batteries, network providers and mobile phone models). Built-in with a mini USB connector for Motorola V3, O₂, and Blackberry, the universal pack is also available with four additional connectors that fit most current models of Nokia, Sony Ericsson, Samsung, and Siemens mobile phones.

Thanks to its compact size, the GP Instant Power Emergency Charger is portable and can be put in handbags, pockets and briefcases. Consumers can instantly charge their mobile phones anytime and anywhere for use of extended hours.

“We pride ourselves on the GP Instant Power series for the convenience it brings to consumers. The launch of this new universal pack reinforces GP’s commitment in fulfilling different needs of customers. We will continue our effort in developing more user-friendly and convenient products for the market,” said Josephine Ng, Marketing Director of GP Batteries.

GP Instant Power Emergency Charger is powered by two pieces of GP Ultra Alkaline AA batteries. Consumers are also encouraged to use the environmentally friendly GP NiMH or GP ReCyko⁺ rechargeable batteries to help save the environment. GP Instant Power Emergency Charger Universal Pack will be introduced in XXX markets at the suggested retail price of XXX.
